CDS offers on-site respiratory protection programs to help employers protect the health of employees who could be exposed to various occupational diseases and ailments caused by breathing air contaminated with harmful dusts, fogs, fumes, mists, gases, smokes, sprays or vapors. Our trained medical staff is proficient in Respirator Fit and Pulmonary Function testing.

- **Respirator Fit:** CDS offers on-site Respirator Fit services compliant with OSHA regulations.
- **Pulmonary Function Testing:** CDS offers Pulmonary Function Testing to ensure employees meet certain minimum medical clearance standards for respirator use. Also called “spirometry” testing, pulmonary function testing is a test of the air capacity of the lungs. A “spirometer” is used to measure the air inhaled and exhaled by the lungs.

For additional information on how Respiratory Protection services administered by CDS can assist your organization, please contact CDS' professional staff at (800) 439-1454 or by e-mail at info@cdsonsite.com.
